

# ENERGY: OUR ROAD TO CARBON NEUTRALITY

2015 Carbon footprint: 8,030 tCO<sub>2</sub>-e

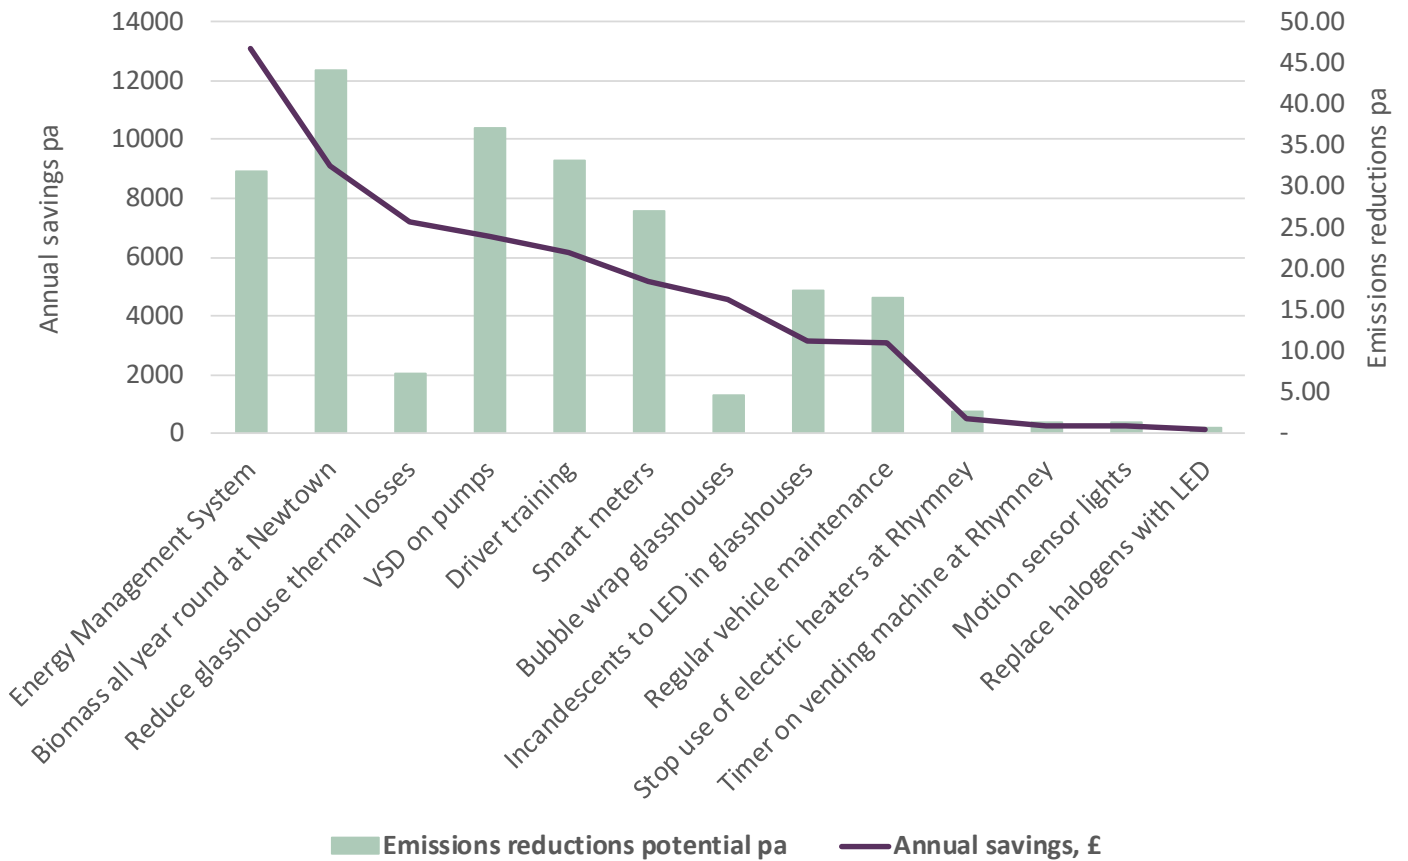

Source: GHG assessment 2014 and 2015, CO2balance

## UK Farms:

- Carbon intensity: 2.1 TCO<sub>2</sub>e/ Ton fruit (for 3815 Tons of fruit)
- **2020 target:** 1.6 TCO<sub>2</sub>e/ Ton fruit
- We need to shave off 1600 Tons off our Carbon footprint
- Next steps: calculate our 2016 and 2017 footprints, compare to the baseline

# Potential emissions reductions and cost savings (ESOS)

- Implementing all recommendations would reduce our 2015 Carbon footprint by around 5%
- Next steps: review and update the cost assumptions, check what has already been done, and make a new proposal
- Implement!
