

WASTE: OUR UK RECYCLING STORY

Proportion of UK waste being recycled between 2014 and 2017 (tons)

- The proportion of waste being recycled has increased annually from 2015
- Waste production decreased in 2017
- Time to increase our focus on reuse, and to continue reducing waste
- 154 tons to landfill in 2017 – a waste audit is required to establish how best to divert it
- Cost per ton increased by 49%, and total cost from £67 345 in 2016, to £81 426 in 2017
- We will find out why, and remedy
